facilities and establishment of a comprehensive Law Library.

* Appointment of sufficient Magistrates of calibre to ensure speedy attention to the needs of the population.

* More legal training for police officers.

* Immediate attention to rebuilding the records of Property Ownership, Birth, Marriage and others, destroyed by the Registry fire.

MOBILIZATION, COMMUNITY DEVELOPMENT AND NATIONAL SECURITY POLICY

The policy-area Mobilization, Community Development and National Security, is extremely important both for developing our country in the interest of all and for ensuring that our people live in an atmosphere of peace and security.

MOBILIZATION

Mobilization is concerned with enabling the population to fully inderstand what Politics really is, how the country is run, how our country is linked to others in the world and what part different classes and groups play in the development of our country.

The DLM-Alliance Government will therefore :

* Adopt National Democracy, that is to say, freedom and a decent life for the broad masses of our people as opposed to Democraty for the Bourgeois that now reigns here, as the best road for the peace and progress of our country.

* Establish programmes to educate the population as to the road on which the country is travelling.

* Set up national and community bodies to coordinate these programmes.

* Recognise the usefulness of organisations of workers, farmers, fisherman, youth, women, students and professionals in the task of mobilising the population.

COMMUNITY DEVELOPEMENT

The development of communities outside the capital city, Roseau, has been severely handicaped because previous government have not really understood what it means to develop a country. In fact, the Division of Local Government that is responsible for community development has been used merely as a political tool for winning elections.

The DLM-Alliance Government sets out to introduce a new system of local government administration based on the following guidelines :

* Establish Constituency and District Councils.

* Increase the responsibilities and scope of local government bodies.

* End the practise of nominating persons to local government bodies.

* Place local government bodies under direct control of the voting public.

NATIONAL SECURITY

Needless to say, as Dominica changes from a country ruled for the Bourgeois, as it now is, to a country ruled for the hard-working poor, under the DLM-Alliance Government, National Security will have to imply security for the underprivileged majority rather than security for the privileged minority. In practical terms this means that Security Forces must behave in a completely new way towards the broad masses of people and, at the same time, take a more serious view of the need to defend our country against foreign enemies.

The DLM-Alliance Government will, therefore :

* Give the security forces as well as the general public a new understanding of each other.

* Place internal law and order under the control of the Police Force, and National Defence under the control of an expanded Defense Force.

* Investigate the Police and Defense Forces with a view to both improving working conditions and introducing a greater degree of democracy in their operations.

Dr. «Para» Riviere, Deputy Party Leader, embodying qualities of honesty, capability, courage and committment.

INFORMATION

Unless our people are kept fully informed of both developments taking place here and world matters that affect us, we will continue to lack a feeling of national identity, and our commitment to nation-building and reconstruction will remain at a low level. This has been one of the major areas of failure on the part of former administrations. To remedy this, the DLM-Alliance Government will :

*Reorganize existing structures to ensure a regular and smooth flow of information between Government and people.

* Undertake publication of a national weekly newspaper.

* Review the situation at DBS Radio, with a view to improving its use as a medium of education.

* Work towards establishment of a national television network.
