# Correspondence.

January 20th , 1953

To The Editor, The Dominica Chronicle

KINDLY permit me space in your Saturday's CHRONICLE to publish this. I thank you in anticipation.

Yours very truly,
LILLAH C. HECTOR,
President, Soufriere Women s Club

On Thursday 8th January, 1953, the Soufriere Women's Club celebrated their 3rd Anniversary. The day's activities began at 5.30, a.m. when the girls attended a Low Mass. At 7.30, they were off on a tour from Point Michel to Trafalgar and Laudat, for a visit to the Fresh Water Lake, and the Water Falls.

Accompanying them on their great day were some friends, and a few well-wishers of Our Parish who wanted to know the above mentioned places.

In spite of the fact that the weather was not at all promising, the members numbering twenty-two (22) spent the day happily indeed. They joked and in general forgot all about the rain and the cold.

Although they could not make the journey to the Lake, they were fortunate enough to have the new experience of seeing the Water Falls, most of them for the first time.

The Asst. Social Welfare Officer suggested the tour, and as she said, it did broaden the outlook of most of the members, for seeing is always better than reading and hearing. It is only a great pity that the Asst. Social Welfare Officer could not find it possible to attend along with the girls who so dearly estimate her for having organized a Girl's Club in their Village. We are sure that for the good the Club is doing, every one wishes it long life, and plenty of Social Activity for the coming year.

REPORT OF WORK DONE DURING THE YEAR 1952.

ON Sunday January 12th 1952, the girls of the Soufriere Women's Club numbering 37, met at the Govt, School for the first quarter; sewing proved itself to be their favourite project for the year. Satisfactory results were shown, but the girls fail to understand that they should try to help one another, when left to themselves which is sometimes unavoidable, and not to depend solely on the help of their Vice President, Miss Unah Pemberton. The making of Ice Cream was their second project. The results here were pretty good also. For the year, they had 8 Cooking lessons, Physical exercises, and lessons in elementary subjects such as English Grammar, Arithmetic etc. Interest in these subjects is high, and the examination results were satisfactory. There were two hikes during the year,
