Facts About Constipation — I

DO YOU KNOW ?

—why constipation often troubles you when you're away from home? The body is used to your daily routine, and the nerves governing digestion and elimination re-act unfavourably to changes in diet, meal-times and climate. Thus the working of your system becomes disorganised and constipation sets in.
Always pack a tin of Andrews Liver Salt when you travel. Sparkling effervescent Andrews — pleasant to take, gentle in action — helps you keep regular under changing conditions.

INFORMATION SERIES NO. 10. 10th February, 1953.

DEPARTMENT OF AGRICULTURE AND FORESTRY

THE POSITION AND FUNCTION OF AGRICULTURAL SHOWS.

THE idea that Agricultural Shows are merely exhibitions or spectacles to represent the whims or fancies of well to do patrons and well meaning individuals is nonsense. Shows have so developed as to bring together all that is best in farming practice. What is even more important and significant is that they represent perfect examples of co-partnership. An Agricultural Show from the first Committee meeting to the payment of the prize money is one big concerted act of service; it is the vital instrument whereby all who take part are brought together, each to make his or her contribution for the benefit, interest and/or enjoyment of the other, and all are needed to make a show successful and therefore worthwhile The Agricultural Show is in fact a sort of focal point for all whose daily lives are concerned with the age long struggle to provide the food and clothes essential to life. In most countries of the world it is a national institution, for example, the Royal Show in England, and the Smithfield Show, which has done so much to educate the English farmer in matters relating to type and quality of meat.

The objects of an Agricultural Show in the main are to improve and stimulate the education of those dependent on the cultivation of the soil for their support, and to encourage good farm cultivation and the improvement of livestock, by the distribution of prizes, These in themselves are laudable objects.

Shows have assisted the development of all that is best in agriculture and livestock by imposing standards at which farmers can aim. Shows do a valuable job in emphasising the results of and the need for good husbandry. They provide a little diversion from business and indeed combine both business, improvement and real interest, helping to link town and country — one of the major problems of our time.

The Educational side of agricultural shows needs no stressing. Agriculture is no longer an ultra conservative, old-fashioned industry. It is an up to date business and a science. Agricultural Shows can have a very important function in the life of the island, provided we can have the goodwill and support of countrymen and townsmen alike.

At this year's show, we hope the standard will be high. In the beautiful Botanic Gardens will be assembled the finest livestock of all kinds in Dominica. In addition there will be an all day cinema show with films of agricultural interest, a forestry section, many educational and scientific exhibits as well as competitions and demonstrations of a practical nature.

Prizes will be in cash and kind and may consist of calves, cacao cuttings, lime plants, dwarf coconut seedlings and Silver Cups. There will also be a parade of the prize winners from the livestock classes.

We trust that the commercial and industrial firms will apply for space to demonstrate their exhibits. Messrs Antilles Products Ltd. have very generously, in response to our request offered a Silver Cup for competition, and donations or other prizes from the public will be gratefully welcomed.

An Agricultura Exhibition remember is the supreme occasion of the island's farming year and a meeting place of agriculturists from all over the island. Support it.

TERESA of the Montessori class had been crying for some time "Teresa," said the sister, "if you stop crying I'll give you a piece of chocolate." The child stops crying at once and gets the candy Another little one, who had heard and seen, to the sister and asks her: "Sister, if I cry and then stop crying, shall I also get a chocolate?
